ROBOTIC ASSISTED SURGERY NOW AVAILABLE AT CEDAR PARK REGIONAL MEDICAL CENTER

October 21, 2009— Cedar Park Regional Medical Center (CPRMC) announced today the successful completion of its first robotic-assisted surgeries performed by Carl Bischoff, M.D., a urologist who recently joined the medical staff at CPRMC. Bischoff performed three kidney related procedures including a pyeloplasty as well as a left radical laparoscopic nephrectomy.

“The da Vinci® Surgical System, provides a surgeon improved visualization, enhanced dexterity, and control. Patients experience shorter hospital stays, less pain, less risk of scarring, and faster recoveries,” said Dr. Bischoff.

“da Vinci robotics is one of our newest additions to our slate of hospital services,” said Abe Martinez, CEO of Cedar Park Medical Center. “We are pleased to have Dr. Bischoff on our medical staff and to provide this technological advancement to our patients. In the coming year, we anticipate increasing the use of robotics across several physician specialties.”

For more information on Cedar Park Regional Medical Center’s robotic capabilities, visit CedarParkRegional.com or call us at 528-7000.
